Copilot for nonprofits is now

\$25.50 per user per month (annual subscription required)

Opus Clip

Used for: Video Repurposing - take a sermon recording and turn it into the clips and sound bytes most likely to go viral, generate b-roll, etc.

\$9 Monthly

Using AI for Ministry

At Enable Ministry Partners, we understand that the world of Artificial Intelligence (AI) can seem daunting. You might have concerns about privacy, ethical use, or simply feel overwhelmed by the complexity of AI. Rest assured, you are not alone! AI can be a powerful ally in your ministry, supporting your mission, improving productivity, and increasing community engagement.

Key Questions & Answers

About AI In The Church

HOW CAN THE CHURCH ENSURE THE RESPONSIBLE USE OF AI?

To responsibly integrate AI tools into ministry, churches should prioritize privacy and use AI to complement, not replace, human brainpower. Establish clear guidelines and best practices that align with your mission and values. Regularly review AI tools and involve your congregation in discussions about AI's role in ministry.

CAN AI HELP WITH SERMON PREPARATION?

AI can be a pastor's best friend and a helpful companion to Bible study software you already use. AI can offer access to extensive theological resources, suggest relevant Bible verses and illustrations, generate sermon outlines, refine your language for clarity and engagement, and even repurpose your sermons into different formats to increase your reach.

HOW CAN AI IMPROVE STAFF PRODUCTIVITY?

AI can streamline tasks like scheduling meetings, taking notes, drafting routine communications, and providing guidance on tools like Word and Excel. This allows church staff to focus more on meaningful interactions and less on administrative tasks.

CAN AI IMPROVE COMMUNITY ENGAGEMENT?

AI can help craft social media content that speaks to the hearts of your community and analyzes interactions to help you discern the pulse of your congregation's feelings and needs. With this understanding you can discover meaningful ways to serve your members and encourage engagement according to their specific circumstances.

HOW CAN CHURCHES USE AI FOR CREATIVE CONTENT GENERATION?

Leverage AI to review sermon recordings and create social media snippets, generate graphic design ideas for sermon series or VBS announcements, and even create full video announcements. This reduces the time staff spend on content creation, allowing them to focus on other important tasks.

Using AI for Ministry

This AI primer is designed as a springboard with ideas and tool recommendations to help you start exploring how AI can enhance your ministry as you start your AI journey. If you have more questions or need personalized guidance, Enable is here to help. Give us a call to start the conversation and explore how AI can support your church's unique needs.
